The Firms dealing in Pumping sets

Gentlemen,

Deep well air-lift pump for the bore well at Channapatna Electrical Colony.

Please intimate your best prices and the earliest time of delivery for the following equipment:—

One deep well air-lift pump with a capacity of 500 gallons per hour against a head of 90 to 100 feet and suitable for a bore well of the description below:—

The bore well is 129 feet deep and the water level is about 45 feet from ground level, that is, there is 84 feet of water; inside diameter of the well at the top is 6' about 40 feet of the well is cased at the top; inside diameter of the well at 40' depth is about 5½"; the static head above ground level to which the water should be pumped is 30 feet, that is, the water level of the reservoir tank should be about 30 feet from the ground level; it is probable that when the water is being pumped, there will be a drop of 10 feet in the water level which means a total lift from the pumping level to point of discharge will be about 90 to 100 feet.

All accessories and fittings such as suitable air compressor complete with driving motor, air receiver complete with safety valve, pressure gauge and air lift fittings complete with fitting clamps should be supplied with the equipment and prices for the above should be given separately in your tender.

Alternatively you may also quote for standard type of Artesian pumps, comprising a force pump, reduction gears, driving motor, etc.

The prices to be quoted should be for delivery f.o.r. Channapatna, Mysore Railways, and should reach the undersigned on or before the 15th August 1931.
